1. Source Code Repositories

SPOCP and related modules is being distributed mainly from two places: [Stockholm university OpenSource](#) and [Umeå University Source Repository](#). The main spocp server distribution, java and perl clients and also the apache authorization module is currently hosted at Stockholm university.

2. FTP Repository

Release tarballs for the main SPOCP server distribution are available from <ftp://ftp.catalogix.se/dist>. Tarballs of Net-SPOCP can sometimes be found at <http://people.su.se/~leifj>.

3. Mailinglist

There is a general discussion mailinglist (low volume) at [discuss at spocp.org](mailto:discuss@spocp.org). You must be subscribed to the list to post. Subscribe by visiting the list site using the [mailman interface](#).

4. Contributing

Send patches to the mailinglist. Commit rights are currently limited to the core development team. Access to the cvs repository for core team members requires ssh access. Please contact [leifj at it.su.se](mailto:leifj@it.su.se) if you have questions.
